

25000w solar energy

Overview

A 25,000-watt (25kW) solar energy system is a high-capacity photovoltaic installation designed to meet the substantial energy demands of large homes, commercial buildings, industrial facilities, or off-grid properties. Capable of generating approximately 30,000 to 45,000 kWh annually depending on. Principle of solar energyThe grid -tied solar system is an electricity generating solar PV power system that is connected to the utility (State) grid. It consists of solar panels, one or several on grid inverters, Wifi Monitor Device, Mounting Brackets and grid connection equipments. Which means that it has 2 1/2 more run time and can recharge 2 times faster than our traditional units. ***Shipping Not Included, must call in for shipping rates. ***The GridFree inverter with limiter with an output of 25000W works with the input voltage range of 200-850Vdc.
