

Acra iron vanadium phosphate lithium battery

Overview

Lithium vanadium phosphate (LVP) is a commonly used cathode material due to its high energy density, low voltage fade, and stability, making it suitable for use in electric vehicles, portable electronic devices, and grid storage. The increasing environmental pollution and energy crisis, along with the intermittent nature of renewable energy sources, have driven the need for reliable energy storage solutions. In the synthesis process of LVP/C samples, the hydrothermal-calcination strategy was used. The raw materials included lithium carbonate (Li_2CO_3). In a typical synthesis, the sample preparation process is illustrated in Fig. 1. It is noted that the hydrothermal-calcination method was chosen in synthesizing LVP/C because it is a versatile method. In conclusion, the synthesis of LVP/C composite cathode material was performed using the hydrothermal-calcination method. The special structural design of LVP/C-150 possesses an ultimate performance. The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

Raising the capacity of lithium vanadium phosphate via anion

The pursuit for batteries with high specific energy provokes the research of high-voltage/capacity cathode materials with superior stability and safety as the alternative for lithium iron phosphate. Herein, using the sol-gel method, a lithium vanadium phosphate with higher average discharge voltage (3.8 V, vs. Li^+/Li) was obtained from a single source for Mg^{2+} and ...

Performance characteristics of lithium vanadium phosphate as a ...

The lithium vanadium phosphate was prepared by mixing stoichiometric amounts of $\text{NH}_4\text{H}_2\text{PO}_4$, V_2O_5 , and Li_2CO_3 . The mixture was initially heated to 300°C in air for 4 h to allow H_2O and NH_3 to evolve. The resulting product was then ground, pelletized, and heated to 850°C under a stream of pure hydrogen for 8 h. Once the furnace had cooled down, the ...
