

Battery storage prices in Italy

Overview

System prices for utility-scale battery energy storage systems (BESS) in Italy have fallen to €280–350 per kWh (AC, fully installed) in 2026, down from €400+ in 2022. Battery storage benefited massively from Superbonus 110% — at peak, batteries paired with PV installed essentially for free. Superbonus phasing out 2024-2025; residual 50% Detrazione + 10% reduced VAT remain. SSP credit doesn't reward export, making battery + self-consumption the primary strategy. With electricity prices soaring to €0.38/kWh (30% above 2023 levels) and grid instability disrupting operations, Italy's renewable energy revolution demands cost-effective storage. This guide breaks down 2025 pricing trends, government incentives, and how to secure competitive BESS quotations in. All were in agreement: prices declined in 2024, and while the trend is expected to continue in 2025, the drop will be more modest. The voices of the distributors interviewed were aligned and engaged. “In recent years, we've seen the market shift from the residential segment to commercial and. The Italian utility-scale battery storage market is one of the most exciting in Europe. For grid-scale projects?

Think €300–€500 per kWh —like buying a Ferrari versus a Fiat Panda. But why such a spread?

Let's unpack this: 1.

Article Content

Battery storage prices fall as demand grows in Italy,

Italian industry players saw energy storage systems fall in price in 2024, but 2025 may be a different story.
