

Car battery for home use

Overview

Yes, you can use bidirectional charging, vehicle-to-grid (VTG), or vehicle-to-house (VTH) technology. With this technology installed, EVs can, in effect, act like home storage batteries when not used for driving. This technology also enables electric vehicles to supply power to the grid during peak demand, thus. Bi-directional charging allows EVs to draw power from and supply power to the electric grid or a home. This means you can charge your car like normal, but the energy flow can also be reversed (VTG), enabling the stored energy in the EV's battery to be fed back into. As we previously mentioned, Octopus Energy and Chinese EV maker BYD have launched a new pilot scheme that allows customers to use their parked electric vehicles as flexible home. Yes, you will need a bidirectional EV charger because ordinary EV chargers cannot power your home or feed electricity back to the grid. Bidirectional chargers function more like.
