

# Colombia electricity market

## Overview

The electricity sector has been unbundled into generation, transmission, distribution, and commercialization since sector reforms were carried out in 1994. About half the generation capacity is privately owned. Despite the country's large potential for new renewable energy technologies (mainly wind, solar, and biomass), this potential has been barely tapped. Demand is growing steadily and supply is gradually advancing, in a context where diversification of sources and thermal backup will be key to maintaining reliability. Colombia has high.
