

# How much does solar container lithium battery for energy storage cost in South America

## Overview

In 2025, the typical cost of commercial lithium battery energy storage systems, including the battery, battery management system (BMS), inverter (PCS), and installation, ranges from \$280 to \$580 per kWh. Larger systems (100 kWh or more) can cost between \$180 to \$300 per kWh. Chile, Argentina, and Bolivia – aka the "Lithium Saudi Arabia" – control 58% of global lithium reserves (USGS 2023). According to data made available by Wood Mackenzie's Q1 2025 Energy Storage Report, the following is the range of price for PV energy storage containers in the market: These cells are further integrated into battery enclosures, which house 5-6 MWh of cells in 20-foot containers. This article provides a transparent, component-level analysis of containerized lithium battery storage costs, explores hidden engineering expenses, and establishes a framework for evaluating total cost of ownership (TCO) and levelized cost of storage (LCOS).
