

# How to connect the 48v battery pack of the mobile base station

## Overview

Use the MJ32-48V cascade cable to connect the host and the EP3000-48V power pack through the cascade port. Proper wiring is not just a recommendation; it is fundamental for safety, performance, and the longevity of your components. This includes cell installation, JK BMS setup, wiring, safety components, and cooling fan configuration. ☐☐ In this video, you'll learn: ✓ How to assemble. In this step-by-step tutorial, you'll learn how to safely install and connect the battery modules, configure communication settings, complete system commissioning, and perform remote firmware upgrades. Whether you're a telecom technician, project installer, or technical engineer, this video guides. Rolls S-Series 48V LFP ESS batteries are designed to scale in parallel capacity only at this voltage level, with communication between batteries and to externally connected equipment. A 48V 20Ah lithium battery. Light press to show battery capacity Long press to turn on/off DC (USB/XT60 12V) Note: Operating temperature range of EP3000-48V is -20~45°C.
