

# Is it okay to install photovoltaic panels on the church

## Overview

The answer to this question is a resounding yes – you can certainly install solar panels on a church roof. The Inflation Reduction Act of 2022, or IRA, changed the requirements for claiming clean energy tax credits, adding organizations that don't typically have tax liability, such as houses of worship, to the list of qualifying establishments. Integrated solar tiles (also known as solar slates) are a discreet option for churches with heritage considerations. This coverage is made possible through a partnership with Grist and Interlochen Public Radio in Northern Michigan. On a Sunday morning in Charlevoix, a small town surrounded by lakes in northern Michigan. In between reflections on scripture, Mays touched on an important venture: The church is planning to install solar panels on their larger meeting hall, working with Michigan-based nonprofit Solar Faithful to do so.
