

Manila demand response

Overview

Metro Manila's residential market is showing signs of recovery, led by strong demand for mid-income condominiums. Developers' RFO promos and eased mortgage rates have boosted sales, while vacancy is expected to peak in 2025. Areas outside the traditional business districts and horizontal projects. Interruptible Load Program (ILP) is a voluntary, demand-side management (DSM) program that allows customers to operate their generating sets and collectively reduce electricity drawn from the grid when power interruptions are imminent to ration limited power supply. The primary goal of the ILP is. The renewed conflict in the Middle East has triggered sharp increases in global oil prices, once again testing the Philippines' economic resilience. The Philippines continues to see a surge in commercial hubs and new community. Since September 4, 2025, a series of widespread demonstrations began in the Philippines, with the largest initial protests occurring on September 21 at Rizal Park and Liwasang Bonifacio in Manila, and at the People Power Monument, Camp Aguinaldo Gate 4, and EDSA Shrine along EDSA in Quezon City.
