

Palau energy efficiency

Overview

The Plan was issued in 2008 and it provides actions for reducing the Republic's energy consumption, both in the public and private sector. The International Renewable Energy Agency (IRENA) is an intergovernmental organisation that supports countries in their transition to a sustainable energy future and serves as the principal platform for international co-operation, a centre of excellence, and a repository of policy, technology. The Energy Efficiency Action Plan (EEAP) for the Republic of Palau was developed under the Support to the Energy Sector in 5 ACP Pacific Island States (REP-5) programme, funded by the 9th European Development Fund. It is also the project management unit for a number of renewable energy and energy efficiency projects in Palau. The Energy Planner will work within the Palau Energy. In 2025, Palau unveiled its National Energy Policy 2024–2050 and the Sustainable Development Goal 7 (SDG 7) Roadmap, marking a significant milestone in the nation's pursuit of a sustainable energy future. This comprehensive strategy aims to transition Palau's energy sector towards reliability. Through the targets set and the submission of our Third Nationally Determined Contribution (NDC 3.

Article Content

Palau's National Energy Policy 2024-2050 and SDG 7

The National Energy Policy outlines a clear vision for Palau's energy sector, emphasizing the need for appropriate regulations to ensure secure energy

SECTOR ASSESSMENT (SUMMARY): ENERGY

A reliable and sustainable energy sector is essential to Palau's to sustain economic growth and development, given the government's vision to achieve renewable energy target of 45% by 2025
