

Reference price of professional solar container lithium battery pack in New York USA

Overview

New York, December 9, 2025 – lithium-ion battery pack prices have dropped 8% since 2024 to a record low of \$108 per kilowatt-hour, according to latest analysis by research provider BloombergNEF (BNEF). But this range hides much nuance—anything from battery chemistry to cooling systems to permits and integration. Let's deconstruct the cost drivers. After coming down last year, the cost of containerised BESS solutions for US-based buyers will come down a further 18% in 2024, Clean Energy Associates (CEA) said. The average 2024 price of a BESS 20-foot DC container in the US is expected to come down to US\$148/kWh, down from US\$180/kWh last year. In today's market, the installed cost of a commercial lithium battery energy storage system — including the battery pack, Battery Management System (BMS), Power Conversion System (PCS), and installation — typically ranges from: \$280 to \$580 per kWh for small to medium-sized commercial projects. Price is \$387,400 each (for 500KWH Bank) plus freight shipping from China.
