

Sunshade cloth on top of energy storage cabinet

Overview

Both of these enclosures are intended for indoor use only. They are both dust resistant. The NEMA 12 enclosure is rated for damp environments. The NEMA 1 is rated only for dry. Both of these enclosures can be used indoors as well as outdoors. They are both dust resistant. They are also water resistant and corrosion resistant. NEMA 4X has an extra layer of corrosion resistance. When selecting the size of an enclosure, it is important to consider the following: how much space will the electrical components occupy, how much space is needed around each component, is. This is a more specific type of enclosure that is rated for use in hazardous environments. It is rated to contain an explosion within the enclosure and not cause any sort of external hazard. When selecting an enclosure, it is important to consider both the ambient temperature and the temperature that is generated inside of the enclosure. When an enclosure is located outside in direct sunlight, that heat can be transferred inside the enclosure. Also.

Hoffman ESSH9030 COMLINE Solar Shield Top fits 11.81" Wide x 5.91" COMLINE Communication Enclosure. Solar shield top decreases temperature rise in enclosures in direct sunlight. Typically 25% reduction in temperture rise with a solar shield top installed.

The Advantages Of Shade Cloth

The point is: If you cover your greenhouse with 63% shade cloth, 12 inches above the roof, 12 inches from the wall, all the way to the ground, a tremendous amount of heat load is dissipated by the cloth, it never gets into your greenhouse, and now dollars are going back into you pocket by reduced energy cost.
