

# The village installs solar panels to make money

## Overview

This is the story of a small farming community that didn't just install solar panels—they started their own solar power company. He never imagined it would be the first step. By harnessing solar energy, these regions can leapfrog into a new era of electrification, using decentralized, affordable, and efficient solar power systems.

3. Home News Highlights Spotlights In rural Alaska, a village turns to solar and biomass energies to cut diesel and save money Workers install panels at a solar project Wednesday, May 21, 2025, in Galena, Alaska. (AP Photo/John Locher) GALENA, Alaska (AP) — Eric Huntington built his dream cabin. Are you looking for affordable housing that is solar powered, built with renewable resources, a way to grow your own food, and a community that works together?

Join Us! We are an active regenerative agriculture research farm that sells organically grown vegetables and mixed greens. Located miles away from. Gadvi Kailashben, a 42-year-old widow, lives in Modhera, home to the centuries-old Sun Temple and now the first village in India that runs on solar energy. She earns a meagre income from agriculture which she uses to take care of her family.
